Descrizione

The AXIS Red Short Fuselage is a 3D CNC cut anodized aluminium fuselage, length is 680mm long.

Incredibly strong connection to any size wings to create a very direct feel from your feet to the front wing, which is the most important part of surf foiling.

Please note: you will need the AXIS Mast Adapter aka the Doodad (in [19mm](#) and [16mm](#)), in order to use with the [AXIS Foils Aluminium masts](#). The doodad is not needed when using the [AXIS Foils Carbon Masts](#)

Available in multiple sizes for different types of riding. (the longer the fuselage the more stable the ride. The shorter the fuselage the looser and quicker the turning)
